

# Iterative Refinement Prompts

Improve AI output through specific feedback

## 1. Improve Clarity

Revise this content to be clearer:

[Paste content]

Make it clearer by:

- Simplifying complex sentences
- Defining technical terms
- Adding examples
- Breaking into shorter paragraphs
- Using active voice
- Removing unnecessary jargon

Target reading level: [specify]

## 2. Add Specificity

This content is too generic. Make it specific to [organization/industry]:

[Paste content]

Add specificity:

- Use our terminology: [list terms]
- Reference our processes: [describe]
- Include industry-specific examples
- Reflect our organizational culture
- Use realistic scenarios from our context

Make it feel authentic to our environment.

## 3. Adjust Tone

Change the tone of this content:

[Paste content]

Current tone: [formal, casual, technical, etc.]

Desired tone: [specify]

Adjust:

- Vocabulary (more/less formal)
- Sentence structure
- Examples and references
- Overall voice

Maintain the same information while changing delivery.

## 4. Increase Engagement

Make this content more engaging:

[Paste content]

Add engagement through:

- Concrete examples learners recognize
- Questions that prompt reflection
- Stories or scenarios
- Surprising facts or statistics
- Practical applications they'll use

Keep length similar but increase interest.
