Scenario Generation Templates

Create realistic workplace scenarios and examples

1. Basic Workplace Scenario

Create a realistic workplace scenario for [topic] training.

Context:
• Role: [job title]
• Situation: [common challenge they face]
• Complication: [what makes this difficult]
• Stakes: [why this matters]

Format as:
1. Brief context setup (2-3 sentences)
2. The challenge/decision point
3. 3-4 realistic response options
4. Explanation of why each option works or doesn't

Make it authentic to [industry] and relevant to [audience experience level].

2. Branching Scenario Template

Create a branching scenario for [skill development].

Setup: [Initial situation in 2-3 sentences]

Decision Point 1: [First choice learner makes]
• Option A: [Choice] → [Consequence] → Decision Point 2A
• Option B: [Choice] → [Consequence] → Decision Point 2B
• Option C: [Choice] → [Consequence] → Decision Point 2C

Continue for 3-4 decision points with realistic consequences.
End with: Best outcome, acceptable outcome, poor outcome paths.

3. Example Generation

Generate 5 realistic examples of [concept] in [context].

Requirements:
• Show range from simple to complex
• Include both good and bad examples
• Make them specific to [industry/role]
• Add brief explanation of what makes each example effective/ineffective

Example: Good customer service email vs. poor customer service email
